Our 3 -4 year old program is a detailed curriculum that focuses on improving preschool age children's basic motor and listening skills. These skills will help them enter society with a more confident and enthusiastic outlook. Our program will enhance positive development in a fun and motivating way.

Our program will also prepare your child for our Children's Martial Arts Program. Your child will be exposed to positive social interaction. They will learn how to work with others and following directions from their instructor.

This program offers the student the opportunity to explore and experience what the Martial Arts has to offer. There are millions of martial arts practitioners all over the world. Men, women and children of all ages and abilities are actively involved in learning how to improve their awareness, health, fitness, confidence and their ability to protect themselves.
