AMENDMENT IV: FLOOD ORDINANCE

Adopted: July 20, 1988
Effective: August 10, 1988

SECTION I. STATUTORY AUTHORIZATION, FINDING OF FACT PURPOSE AND OBJECTIVES

1.1 STATUTORY AUTHORIZATION

The Legislature of the state of Connecticut has in Section 7-148(c)(7) of the General Statutes delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, the Town Meeting of the Town of Woodstock, Connecticut, does ordain as follows:

1.2 FINDING THE FACT

1.2.1 The flood hazard areas of the Town of Woodstock are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairments of the tax base, all of which adversely affect the public health, safety and general welfare.

1.2.2 These flood losses are caused by the cumulative effect of obstructions in flood plains causing increases in flood heights and velocities, and by the occupancy in flood hazard area by uses vulnerable to flood or hazardous to other lands which are inadequately elevated, flood-proofed, or otherwise unprotected from flood damages.

1.3 STATEMENT OF PURPOSE

It is the purpose of this ordinance to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

1.3.1 Restrict or prohibit uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities:

1.3.2 Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

1.3.3 Control the alteration of natural flood plains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;

1.3.4 Control filling, grading, dredging and other development which may increase erosion or flood damage, and;

1.3.5 Prevent or regulate the construction of flood barriers which may increase flood hazard to other lands.

1.4 OBJECTIVES

The objectives of this ordinance are:

1.4.1 to protect human life and health;

1.4.2 to minimize expenditures of public money for costly flood control projects;

1.4.3 to minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;

1.4.4 to minimize prolonged business interruptions;

1.4.5 to minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in flood plains;

1.4.6 to help maintain a stable tax base by providing for the sound use and development of flood prone areas in such manner as to minimize flood blight areas, and;

1.4.7 to insure that potential home buyers are notified that property is in a flood area.

SECTION 2 DEFINITIONS

Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

"Addition (to an existing building)" means any walled and roofed expansion to the perimeter of a building in which the addition is connected by a fire wall or is separated by independent perimeter load-bearing walls in new construction.

"Appeal" means a request for a review of the Building Official's interpretation of any provision of this ordinance or a request for a variance.

"Areas of special flood hazard" is the land in the flood plain within a community subject to one percent or greater chance of flooding in any given year.

"Base flood" means the flood having a one percent chance of being equaled or exceeded in any given year.

"Base Flood" means the flood having a one percent chance of being equaled or exceeded in any given year.

"Basement" means that portion of a building having its floor sub grade (below ground level) on all sides.

"Breakaway wall" means a wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or the supporting foundation system.

"Building" means any structure built for support, shelter, or enclosure for any occupancy or storage.

"Development" means any man-made change to improved or unimproved real estate, including, but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavating, drilling operations, or permanent storage of materials.

"Elevated building" means a non-basement building built to have the lowest floor elevated above the ground level by means of fill, solid foundation perimeter walls, pilings, columns (posts and piers), shear walls, or breakaway walls.

"Flood" or "Flooding" means a general and temporary condition or partial or complete inundation of normally dry land areas from:

- (1) the overflow of inland water;
- (2) the unusual and rapid accumulation of runoff of surface waters from any source.

"Flood Insurance Rate Map (FIRM)" means an official map of a community, on which the Federal Emergency Management Agency has delineated both the areas of special flood hazard and the risk premium zones applicable to the community.

"Flood Insurance Study" is the official report by this Federal Emergency Management Agency. The reports contain flood profiles, as well as the flood Boundary Floodway map and the water surface elevation of the base flood.

"Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

"Floor" means the top surface of an enclosed area in a building (including basement), i.e., top of slab in concrete slab construction or top of wood flooring in wood frame construction. The term does not include the floor of a garage used solely for parking vehicles.

"Functionally dependent facility" means a facility which cannot be used for its intended purpose unless it is located in close proximity to water, such as a docking or port facility necessary for the loading and unloading of cargo or passengers, shipbuilding, ship repair, or seafood processing facilities. The term does not include long-term storage, manufacture, sales, or service facilities.

"Highest Adjacent Grade" means the highest natural elevation of the ground surface, prior to construction, next to the proposed walls of a structure.

"Lowest Floor" means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area, is not considered a building's lowest floor.

"Manufactured Home" means a structure, transportable in one or more sections, which is built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. The term also includes park trailers, travel trailers, and similar transportable structures placed on a site for 180 consecutive days or longer and intended to be improved property.

"Manufactured Home Park or Subdivision" means a parcel, or contiguous parcels, of land divided into two (2) or more manufactured home lots for rent or sale.

"Mean Sea Level" means, for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

"National Geodetic Vertical Datum (NGVD)" as corrected in 1929 is a vertical control used as a reference for establishing varying elevations within the flood plain.

"New Construction" means structures for which the "start of construction" commenced on or after the effective date of this ordinance.

"Start of Construction" (for other than new construction or substantial improvements under the Coastal Barrier Resources Act (P.L. 97-348)), includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, or improvement was within 180 days of the permit date. The actual start means the first placement or permanent construction of a structure (including a manufactured home) on a site, such as the pouring of slabs or footings, installation of piles, construction of columns, or any work beyond the stage of excavation or placement of a manufactured home on a foundation.

Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure.

"Structure" means a walled and roofed building that is principally above ground, a home, a gas or liquid storage tank, or other man-made facilities or infrastructures.

"Substantial Improvement" means any combination of repairs, reconstruction, alteration, or improvements to a structure, taking place during the life of a structure in which the cumulative cost equals or exceeds fifty percent of the market value of the structure. The market value of the structure should be (1) appraised value of the structure prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage occurring. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions.

"Variance" is a grant of relief from the requirements of this ordinance which permits construction in a manner otherwise prohibited by this ordinance where specific enforcement would result in unnecessary hardship.

"Water Surface Elevation" means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, (or other datum, where specified) of floods of various magnitudes and frequencies in the flood plains of coastal or river line areas.

SECTION 3 GENERAL PROVISIONS

3.1 LANDS TO WHICH THIS ORDINANCE APPLIES

This ordinance shall apply to all areas of special flood hazard within the jurisdiction of the Town of Woodstock.

3.2 BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD

The areas of special flood hazard identified by the Federal Emergency Management Agency in its scientific and engineering report entitled "The Flood Insurance Study for the Town of Woodstock, Windham County, Connecticut," dated May 1, 1984, with accompanying Flood Insurance Rate Maps and floodway maps is hereby adopted by reference and declared to be part of this ordinance. The Flood Insurance Study is on file at the Office of the Town Clerk, Woodstock Municipal Building, Woodstock, Connecticut.

3.3 ESTABLISHMENT OF FLOODPLAIN MANAGEMENT ADMINISTRATION

A Development Permit shall be required in conformance with the provisions of this ordinance prior to the commencement of any development activities.

3.4 COMPLIANCE

No structure or land shall hereafter be located extended, converted, or structurally altered without full compliance with the terms of this ordinance and other applicable regulations.

3.5 ABROGATION AND GREATER RESTRICTIONS

This ordinance is not intended to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this ordinance and another conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

3.6 INTERPRETATION

In the interpretation and application of this ordinance all provisions shall be: 1) considered as minimum requirements; 2) liberally construed in favor of the governing body, and; 3) deemed neither to limit nor repeal any other powers granted under state statutes.

3.7 WARNING AND DISCLAIMER OF LIABILITY

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering consideration. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This ordinance does not imply that land outside the areas of special flood hazard or uses permitted within such areas will be free from flooding or flood damages. This ordinance shall not create liability on the part of the Town of Woodstock or by any officer or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made thereunder.

SECTION 4 ADMINISTRATION

4.1 DESIGNATION OF THE ORDINANCE ADMINISTRATOR

The Building Official is hereby appointed to administer and implement the provisions of this ordinance.

4.2 PERMIT PROCEDURES

Application for a Development Permit shall be made to the Building Official on forms furnished by him or her prior to any development activities, and may include, but not be limited to, the following plans in duplicate drawn to scale showing the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities and the location of the foregoing. Specifically, the following information is required:

4.2.1 APPLICATION STAGE

(a) Elevation in relation to mean sea level of the proposed lowest floor (including basement) of all structures (Section 5.3.1 (a));

(b) Elevation in relation to mean sea level to which any non-residential structure will be flood-proofed (Section 5.3.1 (b)(2);

(c) Description of the extent to which any watercourse will be altered or relocated as a result of proposed development;

(d) A statement as to whether or not the proposed alterations to an existing structure meets the criteria of the substantial improvement definition;

(e) A statement as to whether there will be a dry access to the structure during the 100-year storm event. Where applicable the following certification by a registered engineer or architect are required, and must be provided to the Building Official. The design and methods of construction must be certified to be in accordance with accepted standards of practice.

(f) Non-Residential Flood Proofing - must meet the provisions of Section 5.3.1(b);

(g) Enclosed Areas Below the Base Flood Elevation -if the minimum design criteria in Section 5.3.2(a)-5.3.2(c) is not used, then the design and construction methods must be certified as explained in Section 5.3.2(a);

(h) No increase in floodway heights may be allowed. Any development in a floodway must meet the provisions of Section 5.3.3;

(i) Break Away walls - Non-supporting breakaway wall, lattice work or mesh screening shall be allowed below the base flood elevation provided it is not part of the structural support of the building and is designed so as to breakaway, under abnormally high tides or wave action, without damage to the structural integrity of the building on which it is to be used and provided the following design specifications are met:

1. Design safe loading resistance of each wall shall not be less than 10 nor more than 20 pounds per square foot; or

2. If more than 20 pounds per square foot, a registered professional engineer or architect shall certify that the design wall collapse would result from a water load less than that which would occur during the base flood event, and the elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement, or other structural damage due to the effects of wind and water loads acting simultaneously on all building components during the base flood event. Maximum wind and water loading values to be used in this determination shall each have one percent (1%) chance of being equaled or exceeded in any given year (100 year mean recurrence interval).

If breakaway walls, lattice work or screening are utilized the resulting enclosed space shall not be designed to be used for human habitation, but shall be designed to be used only for parking of vehicles, building access, or limited storage of maintenance equipment used in connection with the premises.

Prior to construction, plans for any structure that will have breakaway walls, lattice work or screening must be submitted to the Building Official for approval.

Any alteration, repair, reconstruction, or improvement to a structure shall not enclose the space below the lowest floor except with breakaway walls, lattice work or screening.

(j) Structural Anchoring - All new construction or substantial improvement shall be securely anchored on pilings or columns.

All pilings and columns and the attached structures shall be anchored to resist flotation, collapse, and lateral movement due to the effect of wind and water loads acting simultaneously on all building components. The anchoring and support system shall be designed with wind and water loading values which equal or exceed the 100 year mean recurrence interval (one percent (1%) annual chance floods and winds).

A registered professional engineer or architect shall review and/or develop structural design specifications and plans for the construction and shall certify that the design, specifications and plans for constructions are in accordance with acceptable standards.

(k) A fee in the amount of twenty dollars (\$20.00) shall be charged.

4.2.2 CONSTRUCTION STAGE

Upon completion of the applicable portion of construction, the applicant shall provide verification to the Building Official of the following as applicable:

4.2.3 LOWEST FLOOR ELEVATION

The elevation to be verified for:

(a) A structure in a numbered A zone is the top of the lowest floor (including basement) (Section 5.3.1(a));

(b) A structure which has been flood-proofed is the elevation to which the flood-proofing is effective (Section 5.3.1(b)).

4.2.4 Deficiencies detected by the review of the above listed shall be corrected by the permit holder immediately and prior to further progressive work being permitted to proceed. Failure to submit the survey or failure to make said corrections required hereby, shall be cause to issue a stop-work order for the project.

4.3 DUTIES AND RESPONSIBILITIES OF THE BUILDING OFFICIAL

4.3.1 Duties of the Building Official shall include, but not be limited to:

(a) Review all permit applications to determine whether proposed building sites will be reasonably safe from flooding;

(b) Review all development permits to assure that the permit requirements

of this ordinance have been satisfied,

(c) Advise permittee that additional Federal or State permits may be required, and if specific Federal or State permit requirements are known, require that copies of such permits be provided and maintained on file with the development permit. Possible required permits include but are not limited to: Coastal Area Management Permit, Water Diversion, Dam Safety, and Corps of Engineers 404;

(d) Notify the Council of Governments/Regional Planning Agency and the affected municipality at least 35 days prior to the public hearing if any change of regulation or use of a flood zone will affect an area within 500 feet of another municipality;

(e) Notify adjacent communities and the Department of Environmental Protection - Water Resources Units prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Emergency Management Agency;

(f) Assure that maintenance is provided within the altered or relocated portion of said watercourse so that the flood carrying capacity is undiminished;

(g) Record the elevation (in relation to mean sea level) of the lowest floor (including basement) of all new or substantially improved structures, in accordance with Section 5.3.1.(a));

(h) Record the elevation (in relation to mean sea level to which the new or substantially improved structures have been flood-proofed, in accordance with Section 5.3.1(b);

(i) When flood proofing is utilized for a particular structure the Building Official shall obtain certification from a registered professional engineer or architect, in accordance with Section 5.3.1(b);

(j) Where interpretation is needed as to the exact location of boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field condition) the Building Official shall make the necessary interpretation. The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this article;

(k) When base flood elevation data or floodway data have not been provided then the Building Official shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source in order to administer the provisions of Section 5, and;

(l) All records pertaining to the provisions of this ordinance shall be maintained in the office of the Building Official;

SECTION 5

2. Elevation construction standards include: piling, foundations placed no more than 10 feet apart, and reinforcement is provided for piers more than six feet above ground level.

5.1.9 In any portion of a watercourse which is altered or relocated, the flood carrying capacity shall be maintained, and;

5.1.10 A structure already in compliance with the provisions of this ordinance shall not be made non-compliant by any alteration, repair, reconstruction or improvements to the structure.

5.2 STANDARDS FOR STREAM WITHOUT ESTABLISHING BASE FLOOD ELEVATIONS AND/OR FLOODING

Obtain, review, and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source, including data developed pursuant to Section 4.3.1(k) of this ordinance, as criteria for requiring that new construction, substantial improvements, or other development in Zone A on the Community's FIRM meet the standards in Section 5.3, and Section 6.

5.2.1 In A Zones where base flood elevations have been determined, but before a floodway is designated, require that no new construction, substantial improvement, or other development (including fill) be permitted which will increase base flood elevations more than one (1) foot at any point along the watercourse when all anticipated development is considered cumulatively with the proposed development.

5.2.2 Should data be requested and/or provided, adopt a regulatory floodway based on the principal that the floodway must be able to convey the waters of the base flood without increasing the water surface elevation more than one (1) foot at any point along the watercourse.

5.3 SPECIFIC STANDARDS

5.3.1 In all areas of special flood hazard A1-30, where base flood elevation data has been provided, as set forth in 3.2 or 4.3.1(k), the following provisions are required:

(a) Residential Construction: New construction or substantial improvement of any residential structure shall have the lowest floor, including basement, elevated at least to one (1) foot above the base flood elevation.

(b) Non-Residential Construction:

1. New construction or substantial improvement of any commercial, industrial, or non-residential structure located in Zones A1-30, shall have the lowest floor, including basement, elevated at least one (1) foot above the level of the base flood elevation; or

2. Non-Residential structures located in all A zones may be flood-proofed in lieu of being elevated provided that together with all attendant utilities and sanitary facilities the area of the structure below the required elevation are water tight with walls substantially impermeable to the passage of water, and use structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effect of buoyancy. A registered professional engineer or architect shall review and/or develop structural design, specification, and plans for the construction, and shall certify that the design

and methods of construction are in accordance with acceptable standards of practice for meeting the provisions of this subsection. Such certification shall be provided to the official as set forth in Section 4.2.1(f).

5.3.2 ELEVATED BUILDINGS

New construction or substantial improvements of elevated buildings that include fully enclosed areas formed by foundation and other exterior walls below the base flood elevation shall be designed to preclude finished living space and designed to allow for the entry and exit of floodwaters to automatically equalize hydrostatic flood forces on exterior walls.

(a) Designs for complying with this requirement must either be certified by a professional engineer or architect or meet the following minimum criteria:

1. Provide a minimum of two opening having a total new area of not less than one square inch for every square foot of enclosed area subject aid flooding;
2. The bottom of all opening shall be no higher than one foot above grade, and;
3. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic flow of floodwaters in both directions.

(b) Electrical, plumbing, and other utility connections are prohibited below the base flood elevation, and;

(c) Access to the enclosed area shall be the minimum necessary to allow for parking of vehicles (garage door) or limited storage of maintenance equipment used in connection with the premises (standard exterior ow) or entry to the living area (stairway or elevator).

5.3.3 FLOODWAYS

Floodways located within areas of special flood hazard are areas designated as floodways on the community's Flood Boundary and Floodway Map or as may have been determined in Section 4.3.1.(k). Since the floodway is an extremely hazardous area due to the velocity of flood waters which carry debris, potential projectiles, and has erosion potential, the following provisions shall apply:

Prohibit encroachments, including fill, new construction, substantial improvements and other developments unless certification (with supporting technical data) by a registered professional engineer is provided demonstrating that encroachments shall not result in any (0.00) increase in flood levels during occurrence of the base flood discharge.

SECTION 6 STANDARD FOR SUBDIVISION PROPOSALS

In all special flood hazard areas the following requirements shall apply:

- 6.1 All subdivision proposals shall be consistent with the need to minimize flood damage;
- 6.2 All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage;
- 6.3 All subdivision proposals shall have adequate drainage provided to reduce exposure to flood hazards, and ;
- 6.4 In Zone A base flood elevation data shall be provided for subdivision proposals and other proposed development (including manufactured home parks and subdivisions) which are five acres or fifty lots, whichever occurs first.

SECTION 7 VARIANCE PROCEDURES

- 7.1 The Woodstock Inland Wetlands and Watercourses Agency as established by the Town of Woodstock shall hear and decide appeals and requests for variances from the requirements of this ordinance.
- 7.2 The Woodstock Inland Wetlands and Watercourses Agency shall hear and decide appeals when it is alleged there is an error in any requirement, decision, or determination made by the Building Official in the enforcement or administration of this ordinance.
- 7.3 Any person aggrieved by the decision of the Woodstock Inland Wetlands and Watercourses Agency Commission or any person owning land which abuts or is within a radius of one hundred (100) feet of the land in question may appeal within 15 days after such decision to the State Superior Court as provided in Section 8-8 of the General Statutes.

7.4 SPECIFIC SITUATION VARIANCES

7.4.1 Buildings on an Historic Register

Variances "may" be issued for the reconstruction, rehabilitation or restoration of structures listed on the National Register of Historic Places of the State Inventory of Historic Places without regard to the procedures set forth in the remainder of this section, except for Section 7.5.3(a)-7.5.3(d), and provided the proposed reconstruction, rehabilitation, or restoration, will not result in the structure losing its historical character.

7.4.2 Pre-Existing, Small Lot Location

Variances "may" be issued by a community for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, in conformance with Section 7.5.3(a)-7.5.3(d).

7.4.3 Functionally Dependent Uses

Variances "may" be issued for new construction and substantial improvement and other development necessary for the conduct of a functionally dependent use provided the structure or other development is protected by methods that minimize flood damage, create no additional threat to public safety and meet the requirements of Section 7.5.3(a)-7.5.3(d).

7.4.4 Floodway Prohibition

Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.

7.5 CONSIDERATIONS FOR GRANTING OF VARIANCES

7.5.1 In passing upon such application, the Woodstock Inland Wetlands and Watercourses Agency shall consider all technical evaluations, all relevant factors, all standards specified in other sections of this ordinance and:

- (a) The danger that material may be swept onto other lands to the injury of others;
- (b) The danger to life and property due to flooding or erosion damage;
- (c) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
- (d) The importance of the services provided by the proposed facility to the community;
- (e) The necessity of the facility to waterfront location, in the case of a functionally dependent facility;
- (f) The availability of alternative locations, not subject to flooding or erosion damage for the proposed use;
- (g) The compatibility of the proposed use with existing and anticipated development;
- (h) The relationship of the proposed use to the comprehensive plan and floodplain management program for that area;
- (i) The safety of access to the property in times of flood for ordinary and emergency vehicles;
- (j) The expected heights, velocity, duration, rate of rise and sediment transport of the flood waters, and the effects of wave action, if applicable, expected at the site, and;
- (k) The cost of providing governmental services during and after flood conditions including maintenance and repair of public utilities and facilities such as sewer, gas, electrical and water systems, and streets and bridges.

7.5.2 Upon consideration of the factors listed above, and the purposes of the ordinance, the Woodstock Inland Wetlands and Watercourses Agency shall attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.

7.5.3 Conditions for Variances

(a) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief; and in the instance of a historical building, a determination that the variance is the minimum necessary so as not to destroy the historic character and design of the building.

(b) Variances shall only be issued upon:

1. a showing of good and sufficient cause,
2. a determination that failure to grant the variance would result in exceptional hardship, and
3. a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisance, cause fraud on a victimization of the public or conflict with existing local laws or ordinances.

(c) Any applicant to whom a variance is granted shall be given written notice specifying the difference between the base flood elevation and the elevation to which the structure is to be built and stating that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation up to amounts as high as \$25.00 for \$100.00 of insurance coverage.

(d) The Building Official shall maintain the records of all appeal actions and report any variances to the Federal Emergency Management Agency upon request.

7.6 PENALTIES FOR VIOLATION

Violation of the provisions of this ordinance of failure to comply with any of its requirements, including violation of condition and safeguards established in connection with grants of variance or special exceptions, shall constitute a misdemeanor. Any person who violates this ordinance or failed to comply with any of its requirements shall, upon conviction thereof, be fined not more than \$250.00 per day if proven done willfully and \$100.00 per day if not, or imprisoned for not more than 10 days for each day of violation or both, and in addition, shall pay all costs and reasonable legal fees involved in the case. Nothing herein contained shall prevent the Town of Woodstock from taking such other lawful action as is necessary to prevent or remedy any violation.

SECTION 8 VALIDITY

8.1 If any section, subsection, clause or phrase of this ordinance is, for any reason, found

to be invalid by a Court of competent jurisdiction, such decision shall not effect the validity of the remaining portions of this ordinance.

HISTORIC DISTRICT ORDINANCE TOWN OF WOODSTOCK, CONNECTICUT

Adopted: November 15, 1995

Effective: December 9, 1995

Be it ordained by the Town of Woodstock to adopt the following Historic District Ordinance, pursuant to the provisions of Sections 7-147a to 7-147k, inclusive as amended, of the General Statutes of Connecticut.

SECTION I: PURPOSE

To promote the educational, cultural, economic, and general welfare of the public through the preservation and protection of buildings, places, and districts of the Town which are important for their historical and architectural values, the Board of Selectmen is hereby authorized to establish an Historic District Commission in the Town of Woodstock. The Woodstock Hill Historic District shall be the first historic district protected under this ordinance.

SECTION II: COMMISSION

The Historic District Commission (hereinafter called the "Commission") shall promote the purposes set forth in this ordinance and perform all functions as provided in this ordinance and as shall from time to time be prescribed under the General Statutes of Connecticut. Said Commission shall consist of five (5) regular and three(3) alternate members, who shall be electors of the Town of Woodstock, holding no salaried municipal office in said Town, to be appointed within thirty (30) days of the effective date of this ordinance by the Board of Selectmen in such a manner that the term of at least one member shall expire each year, and their successors shall be appointed in like manner for terms of five years. Vacancies shall be filled for the unexpired term and in the same manner as the original appointment. At least one member of the Commission shall reside in the historic district, or each of the historic districts, as appropriate, under the jurisdiction of the Commission, if any persons reside in any such district(s) and are willing to serve on the Commission. The Commission shall elect annually a chairperson, a vice-chairperson and a clerk from its own number. Each member and alternate shall continue in office until his/her successor is duly appointed, shall serve without compensation, and may be appointed for another term or terms.

SECTION III: CERTIFICATE OF APPROPRIATENESS

Except as described in Section V(c.), no building or structure shall be erected, altered, restored, moved or demolished within an historic district until after an application for a Certificate of Appropriateness as to exterior architectural features has been received and approved by the Commission. No building permit for erection of a building or structure or for alteration of an exterior architectural feature within an historic district shall be issued by the Town of Woodstock or any department, agency or official thereof until a Certificate of Appropriateness has been issued. A Certificate of Appropriateness shall be required whether or not a building permit is required.

As used above, "building" means a combination of materials forming a shelter for persons, animals or property; and "structure" means any combination of materials, other than a building, which is affixed to the land, and shall include, but not be limited to signs, monuments, lighting, fences and walls.

No area within an historic district shall be used or expanded for industrial, commercial, business, home industry, occupational or institutional parking until after an application for a Certificate of Appropriateness as to parking has been submitted and approved by the Commission.

SECTION IV: UNREGULATED ACTIVITIES

This ordinance shall not be construed to regulate:

1. the color of paint on the exterior of any building or structure;
2. interior arrangements or use;
3. the ordinary maintenance or repair of any exterior feature which does not involve a change of design or appearance;
4. exterior architectural features not visible from a public street, way or place.

SECTION V: PROCEDURES

a. Filing Application. An application for a Certificate of Appropriateness shall be filed with the Commission through the office of the Building Inspector.

b. Notice, Hearings, Approvals and Appeals. The Historic District Commission shall hold a public hearing upon each application for a Certificate of Appropriateness unless the Commission determines that such application involves items not subject to approval by the Commission. The Commission shall fix a reasonable time and place for such hearing. Notice of the time and place of such hearing shall be given by publication in the form of a legal advertisement appearing in a newspaper having a substantial circulation in the Town of Woodstock not more than fifteen days and not less than five days before such hearing.

i) Within not more than sixty-five days after the filing of an application, the Commission shall pass upon such application and shall give written notice of its decision to the applicant. If approval is

granted, a Certificate of Appropriateness will be issued by the Commission. Failure of the Commission to act within said sixty-five days shall constitute approval and no other evidence of approval shall be needed.

ii) If a Certificate of Appropriateness has been denied, the Commission shall place upon its records and in the notice to the applicant the reasons for its determination.

iii) All hearings and meetings of the Commission at which decisions are made shall be open to the public. The Commission shall keep a permanent record of its resolutions, transactions and determinations and of the vote of each member participating thereon.

iv) Any person aggrieved by a decision of the Commission may appeal to the Superior Court in accordance with Section 7-147i of the Connecticut General Statutes.

v) The Commission may issue a Certificate of Appropriateness with stipulations.

c. Adoption of Rules. The Commission shall adopt rules of procedure which it deems necessary to carry out the intent of sections 7-147a through 7-147k of the General Statutes and expressed in Section I of this ordinance. The Commission shall adopt regulations not inconsistent with the provisions of sections 7-147a through 7-147k, inclusive as amended, to provide guidance to property owners as to factors to be considered in preparing an application for a Certificate of Appropriateness. Such regulations shall not be such as to bind the Historic District Commission to any uniform or necessarily traditional style throughout the district, but shall look both to the protection of the old and to the interest and distinctiveness of this community. The purpose of regulations should be to uphold the general spirit of preserving the character of a district, but the Commission will in its deliberations include ample consideration of the traditional importance to the town of educational, religious, civic and agricultural activities. Specifically, in the interests of promoting the welfare of the town, the following structures and buildings will be brought to the Historic District Commission for review, but will be exempt from requiring a Certificate of Appropriateness: 1) all institutional construction beyond one hundred fifty feet from a public way that is intended for or in support of outdoor athletic activity and 2) portable classrooms that are in place no more than three years, renewable for one additional three-year period by agreement between the institution involved and the Commission.

SECTION VI: ENFORCEMENT

Regulations and orders of the Commission shall be enforced by the Building Inspector.

SECTION VII: EFFECTIVE DATE

This ordinance shall take effect fifteen (15) days after its publication in a newspaper having a substantial circulation in the Town of Woodstock.

It is anticipated that the fees in Schedule A will reimburse the Town for customary expenses incurred in the processing of each of the applications from the time of acceptance through to a decision. The Planning and Zoning Commission may assess additional fees for all reasonable and necessary consulting services at any time during the application process if the size, complexity, and/or potential impact of the project require additional staff time, specialized assistance or expertise. The requested technical assistance shall directly pertain to the statutory jurisdiction of the Commission. The requested supplemental fee shall be limited to the documented actual cost of retained technical consultants.

The approved fee for technical assistance together with the application fee from the fee schedule shall be paid forthwith. No application shall be deemed filed and complete unless accompanied by the appropriate application fees.

(d) Any consultant fees not expended on review of the application shall be refunded to the applicant upon conclusion of the application process.
